CS 5570   Architecture of Database Systems   V Kumar

Bibliography and Research Report Format

Your research report must refer to relevant research papers, books, documents, etc. So the first task is to prepare a detailed bibliography. The format of the bibliography is as follows:

Bibliography

1. Title of the paper/report. (Example: *Indexing Location Dependent Data in Broadcast Environment*)
2. Paper reference: Authors, title of the paper, and where published. Avoid just giving the URL. (Example: *Debopam Acharya and Vijay Kumar. "Indexing Location Dependent Data in Broadcast Environment", Journal of Digital Information Management (JDIM), Vol. 3, Issue 2, June 2005.*)
3. Abstract of the paper in your OWN words. DO NOT COPY THE ABSTRACT FROM THE PAPER YOU READ.
4. A brief evaluation of the work presented in the paper.
5. You must survey and review at least 10 research reports.

Research Report Format

After bibliography you work on your research report (You can make your bibliography as a part of your research report. It will go at the end of the paper under "References" heading.) The format of your research report is as follows:

Cover page must contain only the following information

1. Title of your project
2. Group members' name
3. E-mail address
4. Semester and submission date

Rest of the pages of the report

1. Project title
2. Group members' name
3. Abstract
4. Introduction
    a. A detailed introduction to the topic area.
    b. The current state of the topic area.
    c. The structure of the paper/report.

5. A detailed review of the existing work in this topic. You have done this in preparing your bibliography.
6. A detailed description of the problem you are investigating.
7. A description of your approach.
8. A detailed description the scheme/algorithm you developed.
9. Expected behavior (performance) of your scheme.
10. Conclusions and future directions.

Note: You must follow Bibliography and Report format. A good quality report usually have 10-15 pages. Your report must be typed, hand written copy will not be accepted. The quality of your report must be of a conference standard. So pay careful attention in preparing your report. I will not accept a report which does not explain or discuss your research contribution. You are free to discuss with me your research.
